

Precision

My extracts work because they are extremely precise. That precision depends substantially on the **QUALITY AND TREATMENT** of the original raw material. Thus extreme care is taken in the selection of the **RAW MATERIAL**.

Materials

Natural sources like the seeds of grapes and the bark of pine are subject to variances in nature. Variances in growing area and climate, for example, can have a substantial effect on the outcome of an extracted ingredient.

Trust

As a user, you should be able to rely on the consistency of my ingredients. Not just now, but a year from now, and for generations to come.

INC

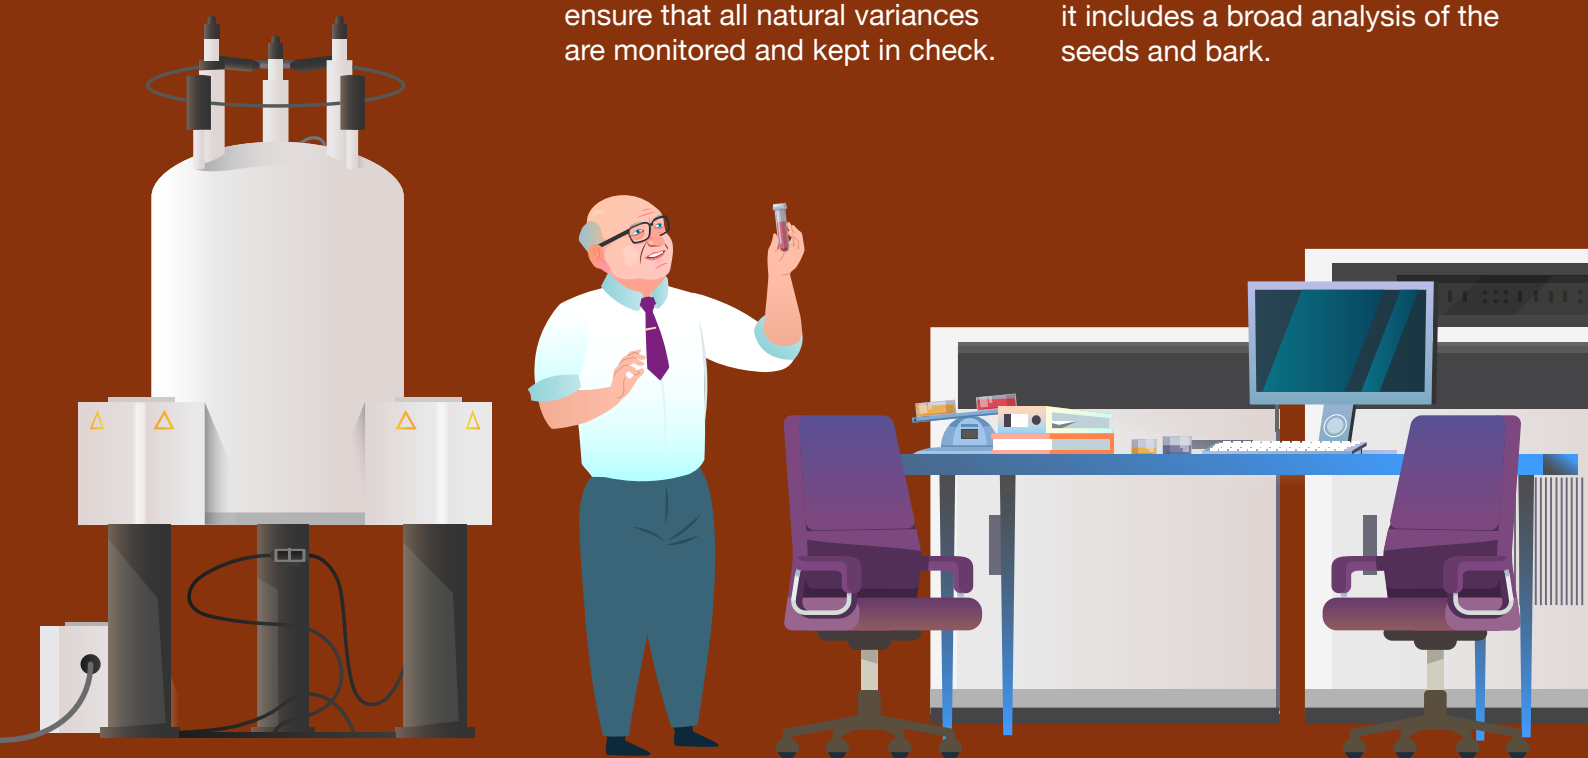

In the 1990s, in order to secure this consistency for the long-term, I began a long-standing cooperation with **INC – International Nutrition Company**.

Consistency

Together with the original manufacturing company, **INC** developed a **RIGOROUS QUALITY MONITORING SYSTEM**. This system helps to ensure that all natural variances are monitored and kept in check.

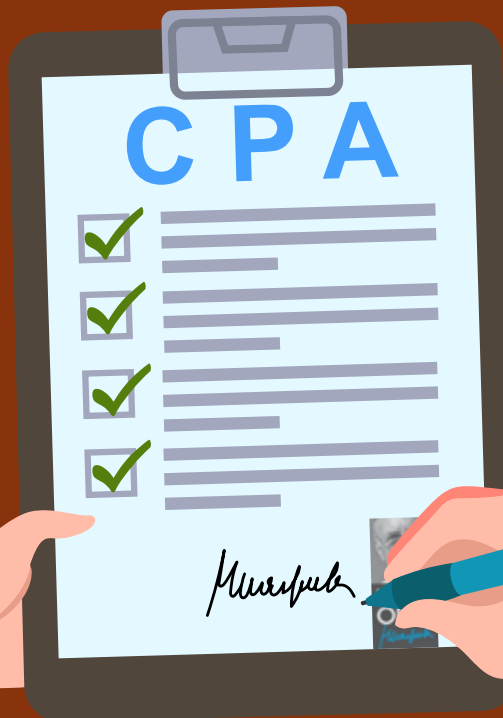

CPA

The system is called **Complex Phytonutrient Authentication – or CPA**. One of the of the world's most advanced and complete **AUTHENTICATION SYSTEMS**, it includes a broad analysis of the seeds and bark.

Monitoring

As a final monitoring system, INC makes use of the most **SOPHISTICATED MOLECULAR DETECTION** machines to measure the consistency of the entire extract for minute variances.

Authenticity

The rigorous and highly advanced CPA system means that **YOU CAN TRUST EVERY PRODUCT** that carries the MASQUELIER's® trademark and the seal of authenticity. Today and in the future, you will benefit from the continuing and high level research into my ingredients.
